Disruptive technology in philanthropy

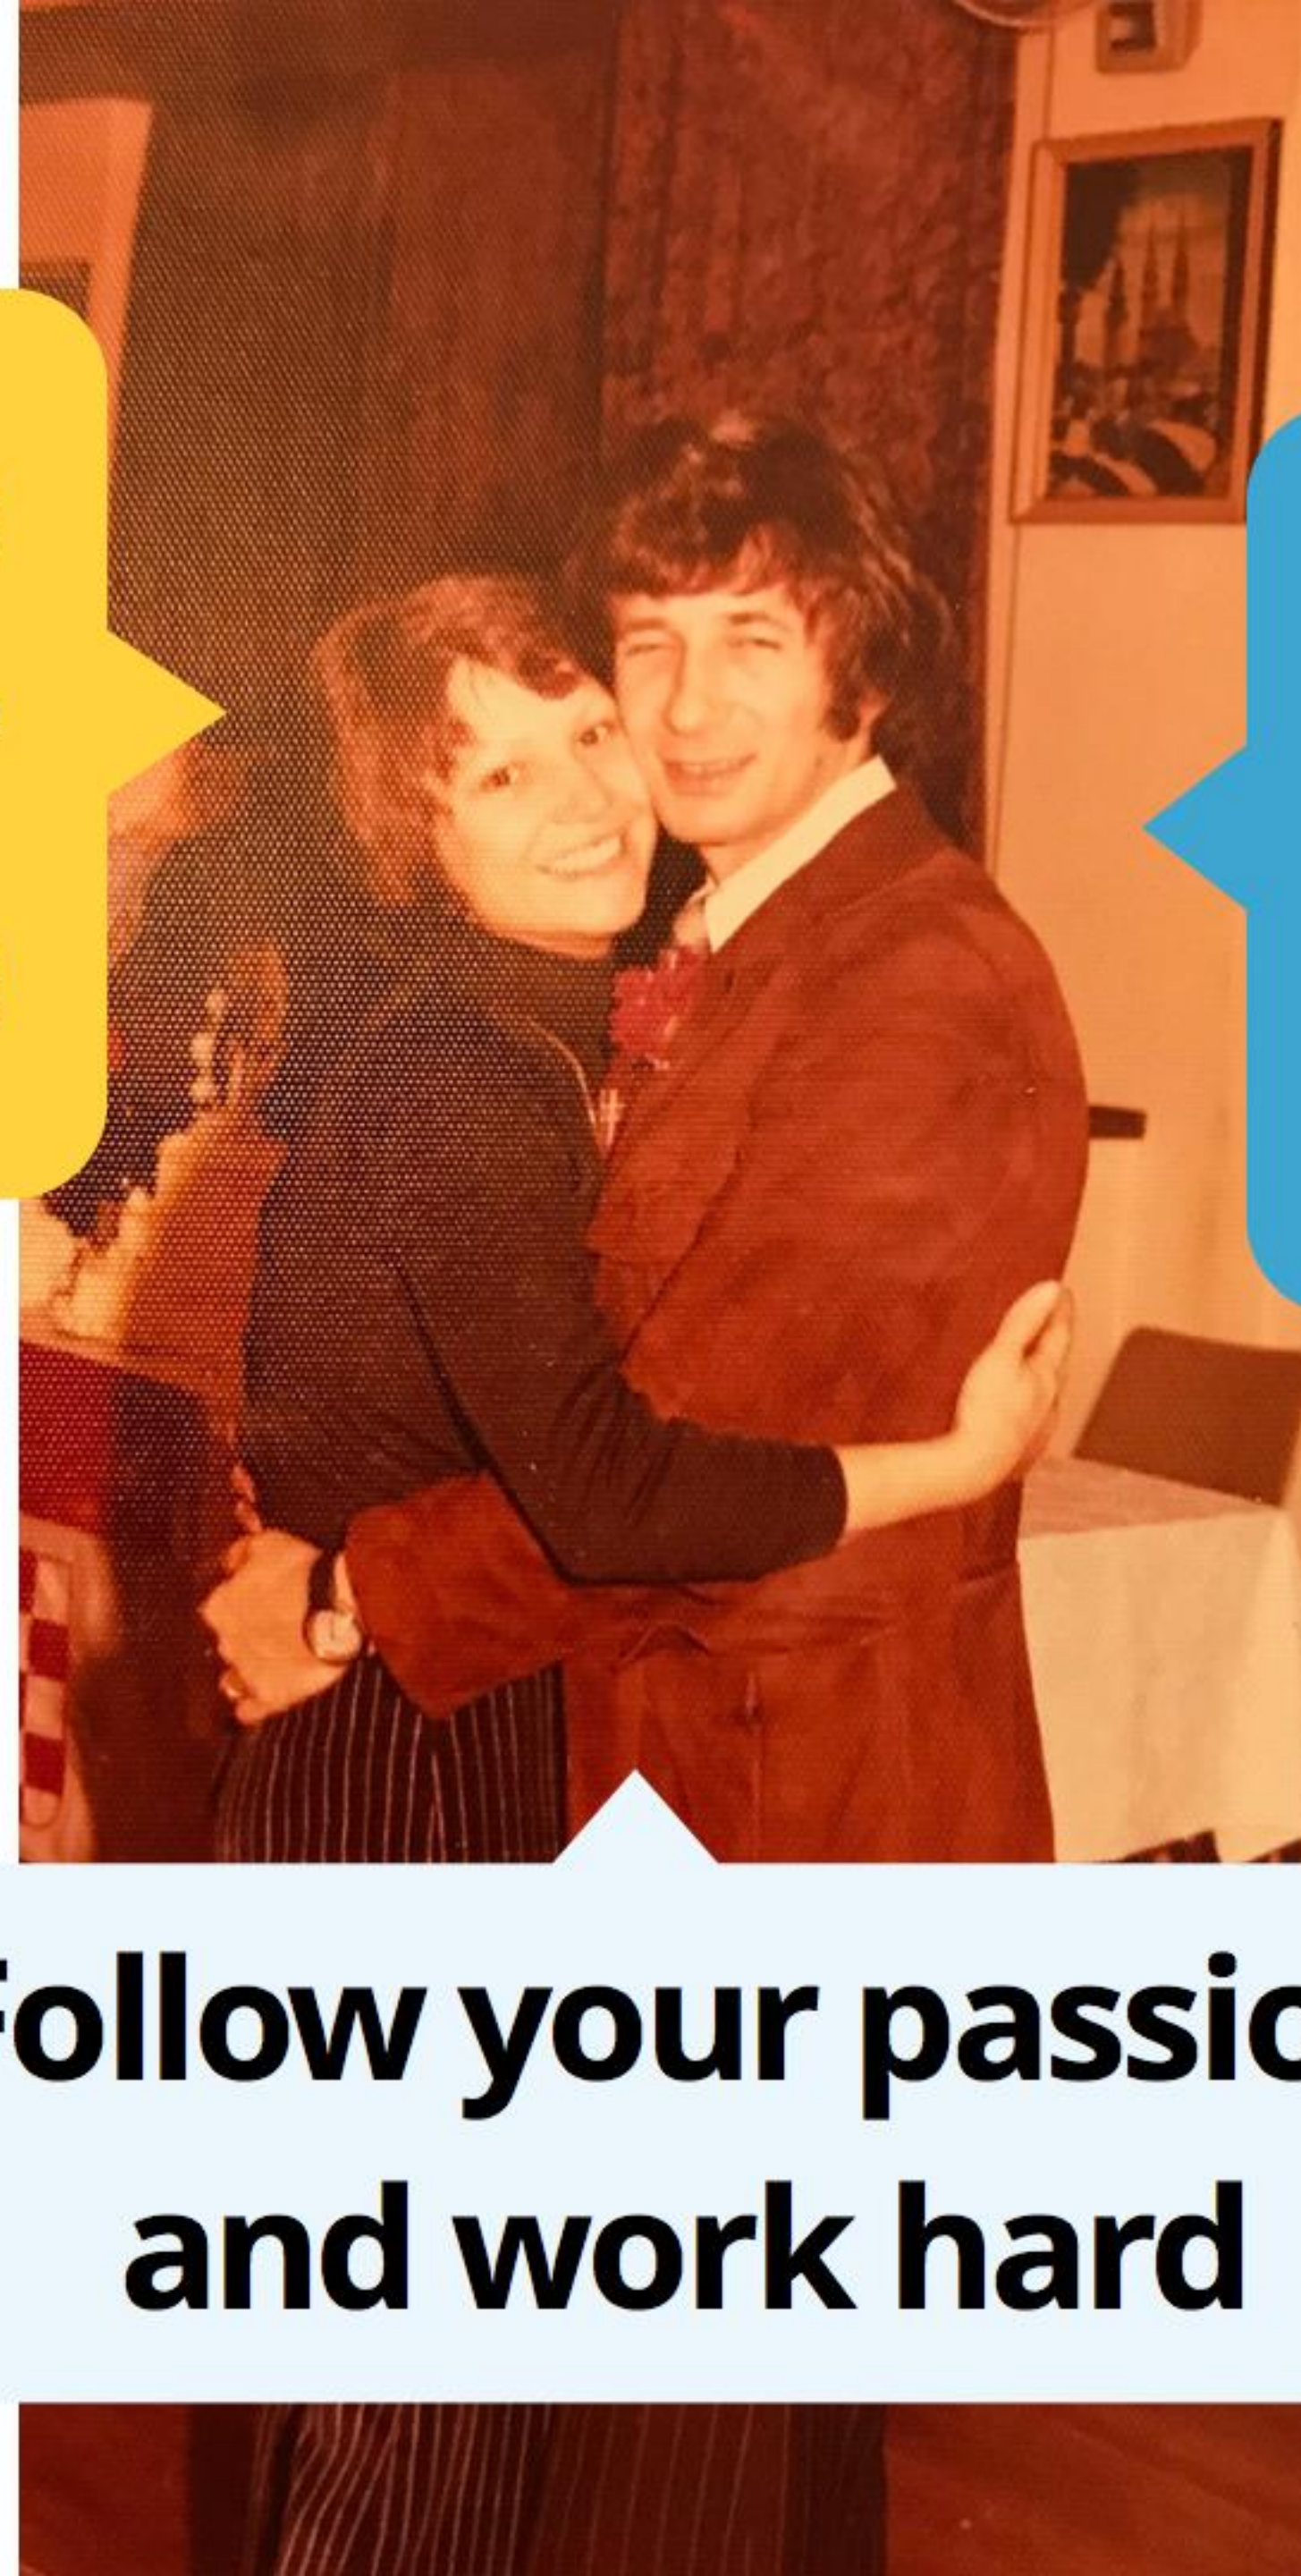

Wikipedia

Philanthropy, the love of humanity,
in the sense of caring, nourishing, developing,
and enhancing what it means to be human.

**Be kind to others
and thankful for
what you have**

**Be respectful
to the people
around you**

**Follow your passion
and work hard**

Uber's virtuous cycle. Geographic density is the new network effect.

- An Airbnb infographic claims that many of the Airbnb travelers would not have traveled otherwise, indicating that the company increases the pie – rather than taking a share of it:

What we're doing about it

Built a really efficient payment system so that we can offer 1% fee on charitable transactions in Australia

**Massively reduces number of transactions
AND we built a digital wallet for charity**

Opportunity

The \$12.5 billion donated by Australian individuals represents but a minute fraction of the global donation pool.

American individuals gave \$373 billion in 2015

GOAL

BLOCKCHAIN

1 A wants to send money to B

2 The transaction is represented online as a "block"

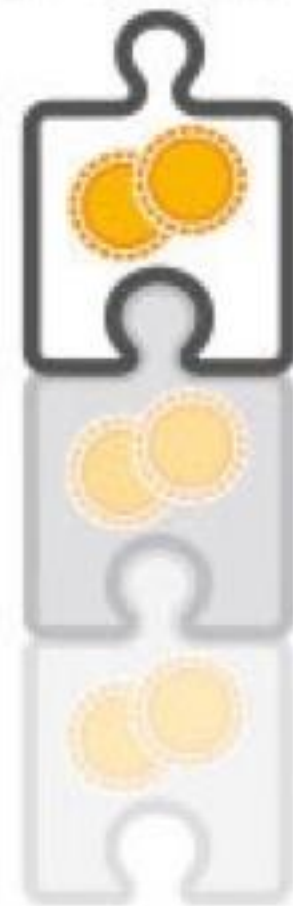

3 The block is broadcast to every party in the network

4 Those in the network approve the transaction is valid

5 The block then can be added to the chain, which provides an indelible and transparent record of transactions

6 The money moves from A to B

Thnx!
